

Discover a variety of built-in benefits

Ongoing development of new technology and new features is at the very heart of Danfoss. We want our switches to be among the very best on the market – living up to your expectations.

- 1 Low differential switching**
Pressure and temperature controls have either fixed or adjustable differential settings, good readability, and high accuracy of range setting with use of the scale.
- 2 Bellows technology**
The lifetime of a pressure and temperature switch is determined by the quality of the bellows. Using advanced technology, and being world leader, Danfoss' bellows are manufactured without any welding points, which makes them stress free and completely tight.

- 3 Designed for various applications**
Danfoss offers a very broad range of purpose-specific enclosures and connections.
- 4 Snap action contacts**
All contacts are "snap-action" types, maintaining the contact force until the moment of contact break. Units with gold-plated contacts are ideal for low electrical loads while the silvercadmium contacts are developed for high loads.

15 international approvals
Danfoss offers a wide range of approvals suited for specific applications and geographical markets.

High vibration stability
Outstanding vibration stability in switches ensures flawless operation even in heavy-duty applications.

Wide pressure ranges
The programme covers working ranges from -1 bar up to 400 bar.

High reliability
All switches feature high accuracy, repeatability and stability over time.

Different sensing elements
As experts in charging technologies, Danfoss offers temperature switches that operate in a wide temperature range.

Engineering Tomorrow

Danfoss is a leading global player within the development and production of mechanical and electronic products and controls. Since 1933, our extensive know-how has made modern life easier and we continue to break new ground within our core business areas.

Every day, more than 250,000 items are produced at 70 factories in 25 countries. Impressive as these figures are, we are most proud of the way our dedicated employees apply the high-quality components in customer solutions, adding value to the end products. Building strong partnerships is of great importance to us, because it is purely by understanding our customers' needs that we can meet the expectations of tomorrow.

This is also true in Industrial Automation, a Danfoss entity dedicated to focusing on the industrial world of today. Through us, you gain access to the entire Danfoss pool of technologies, with special emphasis on sensors and controls.

We offer safer, more reliable and more efficient solutions in a close cooperation based on firm values.

your system

Switch to a reliable supplier

When it comes to demanding applications, Danfoss' know-how and expertise is unsurpassed. Our robust switches offer flawless performance day after day and are trusted in the most challenging situations in a variety of industries and applications, of which some are mentioned in the following.

Marine and railway equipment

Break down of essential functions in trains and ships due to failures in the controls and safety equipment can be dangerous, very costly and time consuming. These customers therefore choose partners who have a good reputation and superior products to offer, among others:

- Temperature and pressure control and alarm functions in lubrication oil systems – type KPS, CAS and MBC
- Pressure control for air compressors – type MBC, KP and RT
- Essential safety control on trains – type RT and CAS

Industrial boilers and boiler room equipment

For boilers and in boiler rooms, accurate monitoring of steam/hot water installations, heat exchangers and water treatment equipment for feed water is vital. Danfoss' programme for steam and high-pressure hot water boilers and burners includes:

- Safety approved pressure controls – type BCP and RT
- Reliable alarm and safety functions – type BCP, RT and KP

Autoclaves and sterilisers

High control and safety are essential within the autoclave process. Temperatures and pressures must be controlled within narrow limits over time by products with high repeatability and trustworthy performance:

- Check of door sealing – type KP, BCP and RT
- Pressure controls of steam supply – type KP, RT and BCP
- Control and alarm of pressure in the process chamber – type BCP, KP and RT

Water pumps and air compressors

In water pumps and air compressors it is important to keep a constant pressure and a continuous flow. To ensure this Danfoss offers a range of switches for:

- Monitoring and direct start/stop of single or three phase motors – type RT, MBC, CS, CAS and KP/KPI
- Dry run protection of pumps – type KP/KPI and RT

Hydraulic equipment and windmills

Danfoss switches are intended for flawless alarm indication, shut down, control and diagnostics in a variety of demanding applications:

- Cooling and lubrication systems for generators and gearboxes – type MBC, KPS, KPI, KP, CAS and RT
- Hydraulic units such as disk brakes and pitch cylinders – type MBC, KPS and RT
- Power packs – type MBC and KP

Choose the optimal solution
